

MATEUS PEREIRA

Software Engineer | React, TypeScript, Backend Services, E2E

Florianopolis, Brazil (UTC-3) | Remote, US Eastern/Central overlap

mateus.sle.per@hotmail.com | github.com/mateusslezinsky

PROFILE

Software engineer with 3+ years of production experience, including remote work for a US startup. Builds and ships product features across React/TypeScript frontends, backend-integrated flows, real-time systems, gRPC APIs, automated testing, and release support. Strongest in product engineering that crosses frontend, services, data, and end-to-end quality.

EXPERIENCE

Pivot Technologies - Contract Software Developer | Remote | Jun 2024 - Present

- Ship production features across React/TypeScript and Expo/React Native, spanning UI implementation, API integration, real-time behavior, testing, debugging, and release support.
- Deploy and support mobile releases to both the Apple App Store and Google Play, including production build and submission workflows.
- Create and maintain 10+ gRPC notification endpoints and flows, contributing to notification-focused TypeScript microservice work.
- Implement real-time product behavior including notifications, typing indicators, and AV/call states across web and mobile clients.
- Own most Playwright E2E coverage (~80%) for critical product paths, improving regression confidence before release.
- Build reusable UI primitives and layout components shared across Next.js/web and mobile codebases, reducing duplicated implementation work.
- Work across product and service boundaries in a small remote team, taking features from implementation through integration and verification.

Serodonto - Software Engineer (Internship to Full-Time; Part-Time Transition Support) | Remote | Aug 2023 - Apr 2025

- Built a React Native mobile app with 20+ screens for dental clinic management workflows.
- Integrated product flows with backend APIs and WhatsApp messaging for clinic communication and operations.
- Implemented client-specific business rules in a product used by hundreds of dental clinics, supporting onboarding and day-to-day workflows.
- Built React/TypeScript PWA and Next.js automation features and contributed across Flutter and C#.NET product work when needed.

TECHNICAL PROFILE

Frontend: React, TypeScript, Next.js, React Native, Expo, Flutter, PWA, design systems, component systems.

Backend / Data: Node.js, TypeScript microservices, gRPC, REST APIs, C#.NET, PostgreSQL, MS SQL Server.

Delivery / Quality: Docker, CI/CD, Playwright, E2E testing, visual verification, code review, App Store and Google Play releases.

Languages: Portuguese (native), English (professional), Spanish (basic).

EDUCATION

Federal University of Santa Catarina (UFSC) | Florianopolis, Brazil

B.S. Information Systems | Oct 2021 - Expected Dec 2026
